Embracing our earthly home

Do you ever look around and reflect on the beauty of nature? It is amazing! Though our main question today is: **How long will this planet remain a safe haven for us?**

Our luxury HOLDEN quality, **a cradle to cradle carpet, is created with eco-friendly yarns made of recycled fishing nets and other waste material recovered from the oceans.** An important act to restore the secure home of the beautiful sea-life, just like this sea turtle above.

The innovative yarn from HOLDEN **feels silky soft like feet gliding away in warm sand on a sunny beach. It shines like the sunlight dancing on the sea surface.** A look and feel that brings nature into your home!

For Holden, not only the raw material is a sustainable choice, but it is also **produced with solar energy produced here on site.** That ensures its production process is ecologically responsible.

Are you eager to design with us a safe haven for the future of our environment and all of mankind? HOLDEN: *to hold safe this place…and a carpet to embrace!*

regenerated nylon:

- eco-friendly material
- made from rescued waste, like fishnets and other waste recovered from the environment
- the process helps saving crude oil, avoiding CO2 emissions, and eliminating waste that pollutes the planet
- this process is safe and guarantees the purity and high quality of the yarn produced
